#### Prices Rose at Opening, but Fell Away, Securities Having Small Support.

NEW YORK. May 22.—The contraction in the dealings in stocks seemed to indicate some subsidence of specularity interest, the total sales for the day falling to the smallest for any day this week.

The opening prices, coupled to the brisk rally at yesterday's closing, resulted in bringing prices in some cases up to near the high levels touched earlier in the week. Traders who thought that this heralded renewal of the advance to new high levels, and who beinght stocks on the assumption were then disconcerted by a sharp reaction. The movement thereafter was almost wholly confused. There was little reflection of news events in the day's market, except in individual stocks.

Not much interest was shown in the forecasts of the bank statement, owing to the unwaried case of the money market. The week's absorption by the Subtreasury and the gold experts in amounted to \$5.735,000. No gold engagements were announced for tomorrow. The time innoney market showed some activity, and especially for six months loans, which were havy. Total sales, par value, \$4,546,000.

United States bonds were unchanged on call.

the local market was due to advices of a most favorable nature from the spot market at Liverpool, which reported large sales at better prices than prevajled yesterday. On the whole the weather report was favorable, but this factor failed to offset the stimulus given the market at the start by the good reports from the English market. During the late session, through lack of support and little disposition to buy, bears hammered the market down, and the July option was seen at its opening level, closing as it opened, 10 points above the close yesterday. At the close to-day, which was steady, the toher active months were \$27 noints below the close yesterday. #### BRADSTREET'S REPORT

BRADSTREET'S REPORT

Bradstreet's to-morrow will say:
Mixed conditions prevailing in the crop trade and industrial situation prevent generalization, except to say that crops as a whole are in rather better shape than a week ago.

There is a better tone in some lines of wholesale trade and retail business of wholesale trade and retail business is quiet beyond the normal and industry is still slack.

Best reports as to retail trade come from the Southwest and Northwest, where weather conditions have favored. Southern trade is still dull and collections are backward, and Eastern trade still reflects the effects of lessened earnings, due to slackness in industry. Wholesale trade in a few lines; notably dry goods, has a better tone; cotton goods are firmer. There is more doing in staple for fall, and some large special lots at auction, or at cut prices, notably at New York Chicago and the St. Louis markets, have distributed large quantities of goods and brought buyers more in evidence than for months past. Production in cotton goods lines is at a low ebb; 1,000,000 spindles are reported idle at the South, and the largest cut in wages ever recorded is noted at Fail River. On the other hand some textile lines report an increased capacity run at some centres.

Business failures in the United States for the week ending May 21st number 234, against 231 last week and 185 in the like week of 1907, 170 in 1906, 173 in 1905, and 184 in 1904.
